1ST PERIOD ACTIVITY SUMMARY:**> Kick-off meeting in Bilbao (Spain), February 3-4th 2016**

On the 3rd and 4th of February 2016 the kick off meeting of the project took place in the headquarters of Grupo Servicios Sociales Integrados in Bilbao (Spain), with the participation of all the partners.

During this meeting, the entities had the opportunity to share their regional models of care for elderly people with chronic disease. The expert Roberto Nuño, of the Health Department of the Deusto Business School of Bilbao, attended the meeting, to present the integrated care model in Euskadi.

The main focus of the meeting was to present the project and the tasks to be undertaken as part of it, planning in detail those tasks that were to be carried out in the coming months. The other activities developed during the meeting concerned aspects of project's management, quality, dissemination and exploitation.

> 2nd Transnational Project Meeting in Bologna (Italy), April 20-21st 2016

On the 20th and 21st of April 2016 all partners of Carevolution project met in Bologna (Italy) at the headquarters of Melius, for the 2nd transnational project meeting.

During this meeting partners presented and discussed the results of the work developed for the last months.

Vilans presented the global results of the analysis on good practices of Integrated Care Models in the regions involved in the project, and Grupo SSI presented the global results about the unmet needs identified in the homes of elderly people with chronic diseases for an Integrated Care. They were the base to reach an agreed decision within the partnership of an updated/evolved professional role of home care workers for an Integrated Care for elderly people with chronic diseases at home, and to discuss the next steps of the Carevolution project, especially the development of the proposal of the updated/evolved professional profile of home care workers, and the new training curricula and learning materials, that will be developed during the following months.

The other activities developed during the meeting concerned the project's management, quality assurance, dissemination and exploitation.
